

Bramhope's Super Science Challenge!

This week, as part of British Science Week, we are launching Bramhope's Super Science Challenge! This is your opportunity to take part in some fun science activities at home! There are 10 challenges to complete but it's up to you how many you want to do. The challenge will run until after the Easter holidays so you have plenty of opportunity to take part.

Here is your challenge checklist:

1. Take a selfie with a minibeast
2. Make slime
3. Plant a seed
4. Visit a science museum
5. Make something that floats and test it
6. Look at and learn about the stars
7. Make something that flies
8. Identify as many different plant and tree types as possible
9. Go pond dipping
10. Learn about the climate in a different country

This challenge is just for fun but we would love to see photos of what you have done! Please take photos to show your participation (caption of what you did included!) and share with your class teacher, on the BPS twitter page or send to science@bramhopeprimaryschool.co.uk.
