

# Recap: Imagine you met a stranger for the first time..

- Would you need to introduce yourself?
- What might they already know about you?

About Me

We learnt last week that a lot of children are using these sites.

# 2 factors to consider

- **This week's focus.**
  - **Online Reputation.**
  - **What is this? Why might it be important.**
  - **Do you really want anyone seeing a private photo?**
- Safety
  - Stranger danger. Do you want strangers to know where you are or which school you go to?

# Factors to consider

- There are some things that are best kept private. What kind of things do you think these might be?
- Once items are shared online – they cannot be removed.

# When you share too much..

This is a story about a boy called Alex. Alex is not someone you know, he doesn't go to your school and Alex isn't his real name – but his story IS real and we know that this has happened to some children

[NSPCC Alex Video](#)

# Class discussion.

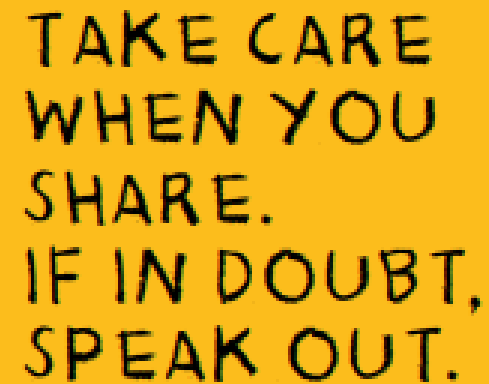

- What happened in the film?
- What were the signs that something that would cause upset was going to happen?
- Should Katie have sent it to other people? What was the impact of Katie sending the photo on to other people? On Alex? On his family? On his friends?
- What could Katie have done instead with the picture when she saw it?
- Give reasons for why Alex should not have sent the photo in the first place. When Alex started to get texts from someone trying to bully him, and a man he didn't know, what could he have done then? What do you think the outcome might be?

# Sharing information online.

- Be safe
- Be respectful
- Be responsible

TAKE CARE  
WHEN YOU  
SHARE.  
IF IN DOUBT,  
SPEAK OUT.

# Remember: Who to go to for help

- Much quicker response than reporting direct to the apps. Police.
- Trusted adult as first option. Who might your trusted adult be?
