

# Times Tables

- 1 Fill in the missing numbers from the **2 times table**.

$$2 \times 2 = \square$$

$$2 \times \square = 8$$

$$\square \times 6 = 12$$

- 2 Circle all the **even** numbers.

12                      104                      8                      1  
                                  28                      513  
 17                      35                      67

- 3 Write down all of the **odd** numbers between 2 and 10.

- 4 Draw a **cross** through the numbers in the **five** times table.  
**Circle** the numbers in the **ten** times table.

  15                       52                       25  
 48                       30                       40                       10

"I know the 2, 5 and 10 times tables.  
 I know if numbers are odd or even."

## Times Tables

### Learn The 2 Times Table

You can work out your 2 times table by counting in 2s.

Even numbers  
end with a  
0, 2, 4, 6 or 8

The 2 times table is  
the even numbers.

Odd numbers  
end with a  
1, 3, 5, 7 or 9

### Use a Clock Face For The 5 Times Table

$1 \times 5 = 5$	$7 \times 5 = 35$
$2 \times 5 = 10$	$8 \times 5 = 40$
$3 \times 5 = 15$	$9 \times 5 = 45$
$4 \times 5 = 20$	$10 \times 5 = 50$
$5 \times 5 = 25$	$11 \times 5 = 55$
$6 \times 5 = 30$	$12 \times 5 = 60$

The 10 times  
table is double the  
5 times table.

### All the 10 Times Table End in 0

$1 \times 10 = 10$	$4 \times 10 = 40$	$7 \times 10 = 70$	$10 \times 10 = 100$
$2 \times 10 = 20$	$5 \times 10 = 50$	$8 \times 10 = 80$	$11 \times 10 = 110$
$3 \times 10 = 30$	$6 \times 10 = 60$	$9 \times 10 = 90$	$12 \times 10 = 120$

## Using Times Tables Facts

**You Can *Multiply* in *Any Order***

This won't work  
for dividing

2 groups of 4 ducks

$$2 \times 4 = 8$$

4 groups of 2 ducks

$$4 \times 2 = 8$$

If you know  
 $4 \times 5 = 20$   
you also know  
 $5 \times 4 = 20$

***Dividing is The Opposite of Multiplying***

Multiply 5 by 4 to get 20.

Times tables  
facts help  
you divide.

$$5 \times 4 = 20$$

$$20 \div 5 = 4$$

Divide 20 by 5 to  
get 4 again.

Multiply 5 trees by 4 apples.  $5 \times 4 = 20$

Divide 20 apples between 5 trees.  $20 \div 5 = 4$

## Using Times Tables Facts

- 1 Circle all the **multiplications** below that equal 10.

  $2 \times 10$        $5 \times 2$        $10 \times 1$   
 $1 \times 10$        $2 \times 5$        $10 \times 2$        $5 \times 5$   
 $0 \times 10$        $1 \times 9$

- 2 Fill in the missing numbers.

$4 \times \boxed{\phantom{00}} = 8$        $2 \times \boxed{\phantom{00}} = 8$   
 $\boxed{\phantom{00}} \times 5 = 30$        $\boxed{\phantom{00}} \times 6 = 30$

- 3 Turn each **multiplication** into a matching **division**.

$4 \times 2 = 8$         $\boxed{\phantom{00}} \div \boxed{\phantom{00}} = \boxed{\phantom{00}}$         $\boxed{\phantom{00}} \div \boxed{\phantom{00}} = \boxed{\phantom{00}}$         $\boxed{\phantom{00}} \div \boxed{\phantom{00}} = \boxed{\phantom{00}}$   
 $8 \times 5 = 40$         $\boxed{\phantom{00}} \div \boxed{\phantom{00}} = \boxed{\phantom{00}}$         $\boxed{\phantom{00}} \div \boxed{\phantom{00}} = \boxed{\phantom{00}}$         $\boxed{\phantom{00}} \div \boxed{\phantom{00}} = \boxed{\phantom{00}}$   
 $6 \times 10 = 60$         $\boxed{\phantom{00}} \div \boxed{\phantom{00}} = \boxed{\phantom{00}}$         $\boxed{\phantom{00}} \div \boxed{\phantom{00}} = \boxed{\phantom{00}}$         $\boxed{\phantom{00}} \div \boxed{\phantom{00}} = \boxed{\phantom{00}}$

"I know that you can multiply in any order.  
I know dividing is the opposite of multiplying."

# Multiplying

## Use Equal Groups to Multiply

3 dogs have 2 bones each. How many bones are there altogether?

There are 3 groups of 2.

Write this as  
 $3 \times 2 = 6$   
 3 times 2 = 6

## Use a Number Line to Multiply

There are 4 piles of 3 leaves. Work out 4 multiplied by 3.

4 groups of 3 is the same as adding 3 four times.

Start at 0 and count right ( $\rightarrow$ ) in groups of 3.

$4 \times 3 = 12$

## Multiplying

- 1 Fill in the missing numbers.

There are  groups of  birds.

There are   $\times 5 =$   birds altogether.

- 2 Join each **addition** to its matching **multiplication**.

  $4 + 4 + 4 + 4 + 4$

$2 \times 4$

$4 + 4$

$5 \times 4$

$4 + 4 + 4 + 4 + 4 + 4 + 4 + 4 + 4 + 4$

$1 \times 4$

$4$

$10 \times 4$

- 3 Show  $6 \times 2$  on the number line. **Circle** the number you end on.

"I can multiply using picture problems and mental maths."
